

Fumigation To Do's

Check off the following with important steps for before and after fumigation:

1 week before:

- Make arrangements for you and your pets to be away for approximately 3 days
- Make additional security arrangements (if desired), and make any alarm adjustments
- Plan your grocery shopping so you don't have extra food that will go bad while you're away
- Close possible entry points to prevent cats or other animals from hiding in/under your house

3-5 days before:

- Prune any plants touching the walls or roof of the house to avoid their damage when tenting
- Make key arrangements if you will not be meeting the fumigators the day of fumigation

2 days before:

- Move non-perishable foods and indoor plants to a safe location
- Water the soil next to the foundation

1 days before:

- Remove perishable foods and medicines (can also be stored in air-tight sealed containers, or Nylofume® bags- available for purchase)
- Turn off automatic timers, heaters and other items listed
- Remove any antennas, vehicles, waterproof coverings, and other recommended items
- Water the soil next to the foundation again

Fumigation Day:

- Be ready to leave the house 1 hour before scheduled arrival.
- Meet the fumigators if key arrangements weren't made in advance.
- Contact the Gas Company for restoration appointment and instructions.

After The Fumigation is Complete:

- Keep the door tag (allowing entry) and meet with Gas Company to restore service.
- Turn on any devices and timers
- Give us a call and let us know how we did and review us on Google, Angie's List, Yelp, Facebook, etc.

*Detailed instructions are provided via print or email once service is scheduled with Superior Care Termite.
